## INTRODUCTION

This is the final increment of a series of Photographic Interpretation Briefs that covers Soviet naval bases and shipyards in southeastern Siberia and on Sakhalin Island, and it contains an index and locator map for this portion of the series. All naval facilities and all shipyards or boat yards which appear to be capable of building or repairing PT or greater size vessels are included in this study.

These brief reports are designed to provide basic facility inventory information in a prescribed geographic area. Previously published detailed NPIC studies of certain significant targets within the area are not superseded by this series.

Each brief will contain identification and reference data, a brief summary of facilities, an annotated photograph, and a locator map of the installation.

A search of all coastline and navigable waterways was accomplished in the area of interest with particular scrutiny being focused on targets carried in the BE and NIS publications. None of the following targets could be identified on good quality KEYHOLE photography.
